English (Writing-Intermediate,Reading-Intermediate,Speaking-Pre-Intermediate), Turkish (Native)

SUMMARY

I graduated as an electronic engineer but have been developing my software skills, especially on android programming since 2016. My aim is to be a senior android developer.

SKILLS

- Java(Experienced), Kotlin for Android(new beginner), Familiar with: C, C++, C#
- Android Studio, Java SDK, Unity(C#), Firebase, JSON, REST APIs, SQLite, Room Database, RxJava
- Material Design, Third-Party Dependencies (Retrofit, Volley, GSON, Picasso, Glide, ButterKnife, Dagger)
- Advanced problem solving skills, determined and fast worker, able to work independently, able to create beautiful and functional applications.

EDUCATION

Ege University - Electrical and Electronics Engineering: 2012 – 2016 (Izmir/TURKEY)

PROJECTS

Bachelor's Degree Thesis

- I developed android app for testing performance of 3G and 4G. It includes RSSI value analyze, download and upload speeds, and their comparisons (It had been in Play Store between 2016-2017)

Locfly

- LocFly provides to send current location without internet (Google Map Api, Material Design, Services)
- <https://play.google.com/store/apps/details?id=com.tsg.loc.locfly>
